Got it

the ability to change data into a useful format for

- Evaluate|Categorize the data according to parsing specs.
- Analysis|Identify specific features about the data.
- Create|Generate a parsed listing of the data.

Part I: Tableau Data Set

In this document:

Answer the following questions about your Tableau data:

1. List the name of the Tableau Dataset you selected in the Acquire Lab: **NFL Offensive Player Stats, 1999-2013**
2. How many rows (records) are in the data set? **8198**
3. How many columns (variables) are in the data set? **39**
4. What assumptions are you making about the data? **I assume that the data presented is accurate, reliable, and credible.**

Use the following link to provide a parsing of the Tableau Data.

<https://tinyurl.com/Parse-Worksheet>

For Visualization Assignment select:

Training Data

Then provide the parsed data and list your assumptions.
